DeepLearning

Development

- python 3.9.12
- pytorch 1.8.0
- matplotlib 3.3.3
- django 4.0.6

Usage

Run server

```
$ python manage.py runserver
```

Then open 127.0.0.1:8000 (as shown in terminal) in your browser.

Rebuild database

```
$ bash rebuild.sh
```

This operation will clear what you stored in database and build a new one. Please run this file under your python environment with django.
